

RECOMMENDED CONTROL PANEL SETTINGS FOR COLORMIX FOR WINDOWS 95 USERS

Sartorius recommends two different configurations for Windows95, dependent on the mixing room lighting conditions.

For low lighting conditions:

- Open "Control Panel"
- Click on "Display"
- Click on "Background"
- Click on "Wallpaper"
- Select "Pinstripe"
- Click on "Apply" to activate settings.

Next,

- Click on "Appearance"
- In the "Item" window, click on the down arrow and select the "Active Title Bar" and "Inactive Title Bar" options. Change the color to Dark Gray, size to 20, font to MS Sans 8, and the scheme to "High Contrast Black" for both of the title bar options.
- Click on "Apply" to activate these settings.

For intense lighting conditions:

All the settings are the same as above EXCEPT:

- "Wallpaper" select "Circles"
- "Scheme" select "High Contrast White"

Additional helpful settings:

- Control Panel
- Appearance
- Item
- Icon-32, Font-8, Bold-B.

You may also "tweak" the display contrast potentiometer located under the small white plastic cap on the left side of the display head for fine tuning.
